.....

Bubble sort

Complexity: $O(n^2)$

It goes through all elements

Guaranteed to sort in n repetitions

.....

Named bubble because large elements raise to the surface
(similar to bubbles in sparkling water)

Parallel bubble sort

These two operations (and all pairs like them)
cannot be executed in parallel

Parallel bubble sort

These two operations (and all pairs like them)
cannot be executed in parallel

Solution hint: The operations do not need
to be executed in exactly the same order

OETS: Odd-Even Transposition Sort

OETS: Odd-Even Transposition Sort

Can be
executed
in parallel →

Can be
executed
in parallel →

.....

OETS: Odd-Even Transposition Sort

Can **NOT** be
executed
in parallel

.....

OETS: Odd-Even Transposition Sort

Solution:
Barrier
between
each
iteration

.....

OETS: Odd-Even Transposition Sort

Parallel complexity:
 p = threads or
 processor cores

$$O\left(\frac{n}{p} * n\right) = O(n) \text{ for } p=n$$

.....

OETS: Odd-Even Transposition Sort

OETS: Odd-Even Transposition Sort

OETS: Odd-Even Transposition Sort
